

Flat Planet Announces Ho Chi Minh City (Vietnam) Operations

FEBRUARY 1, 2019 — FLAT PLANET OPENS A SERVICE DELIVERY CENTRE IN HCMC VIETNAM EXTENDING ITS ABILITY TO TAP BOTH THE TALENTS AND OPPORTUNITIES PRESENTED TO GLOBAL BUSINESS BY EMERGING SOUTHEAST ASIAN MARKETS

Flat Planet has announced the commencement of its operations in Ho Chi Minh City as part of its growing push to provide clients with a sustainable pathway to both build teams and explore opportunities in Southeast Asia.

“Many businesses have long been attracted to the region by its ability to provide high-value talent at a globally-competitive cost to complement operations back home,” said Flat Planet CEO, Chris Moriarty.

“Increasingly, businesses are starting to realize that teams in Southeast Asia, such as those in the Philippines, are not just able to support home market operations, but they can also provide a doorway to the huge opportunities in the world’s most dynamic region.”

Vietnam has a particular competitive advantage in IT skills, said Judy Horan, Flat Planet’s Australian-based Regional Marketing Manager.

“A key strategic focus of the Vietnamese Government has been to develop and build the IT skills of its emerging workforce,” said Horan.

“This represents a fantastic resource that foreign businesses are welcomed to tap into via investing in Vietnamese talent safely and sustainably through Flat Planet.”

Flat Planet recruits, hires, accommodates and manages teams on behalf of other businesses. “You can enter and explore the Vietnamese market quickly, easily, and safely by working with Flat Planet,” said Horan.

“You can be confident that your teams are employed in a fully compliant and quality-focused way, meaning you can concentrate on exploring and maximizing opportunities for actual business growth rather than dealing with the headaches of hiring and compliance.”

“One digital technology client from Melbourne that built teams in the Philippines and Shanghai became so successful at winning business they now win much more business in Asia than is available in their home market even if they managed to get a 100% market share,” said Moriarty.

“They are no longer with Flat Planet, as their business boomed to a size where they had to incorporate and build their own operations — but we were delighted to be a key stepping stone for their success.”

All companies, especially those with a need for professional IT talent, could find it worthwhile to consider Flat Planet Vietnam. Available services to date include among others:

iOS Developer
Android Developer
Java Developer
PHP Developer

.Net Developer
Front End Developer
Back End Developer
Oracle PL/SQL Developer

Full Stack Developer
System Analyst
Business Analyst

ABOUT FLAT PLANET

<https://www.flatplanet.com.au>

Established in 2010, Flat Planet is a boutique BPO that recruits, hires, accommodates and manages bespoke teams in Southeast Asia on behalf of firms around the world. Flat Planet’s high-value teams feature professional skills sets from technology, finance, accounting or engineering disciplines.

It is Flat Planet’s mission to provide foreign firms with a safe, sustainable, and reliable pathway to both build teams, and explore opportunities within Southeast Asia. In late 2018, Flat Planet opened its first centre in Vietnam and commenced operations in Malaysia, both to complement and enhance its well-established, multi-site, Philippine-based teams.
